ORDINANCE NO. _____

AN ORDINANCE OF THE CITY OF SEDGWICK, KANSAS, PROVIDING FOR DELEGATION OF CONTROL OF PLACEMENT AND ERECTION OF CERTAIN TRAFFIC CONTROL SIGNS AT DESIGNATED LOCATIONS WITHIN THE CITY LIMITS AND REPEALING ANY AND ALL OTHER FOREGOING ORDINANCES IN CONFLICT HEREWITH.

WHEREAS, the Governing Body of the City of Sedgwick, Kansas wishes to specify certain locations with limitations on outlet traffic, to erect signs to control traffic flow and regulate traffic on public roadways and property at certain locations within the jurisdictional limits of the City of Sedgwick, Kansas and to provide for the erection of specific signs at the designated locations giving notice of these limitations.

NOW, THEREFORE, BE IT ORDAINED BY THE GOVERNING BODY OF THE CITY OF SEDGWICK, KANSAS:

DRAFT

SECTION ONE: TRAFFIC CONTROL DEVICES AND MARKINGS.

The Standard Traffic Ordinance as adopted is hereby modified by adding thereto the following: The City Administrator or Chief of Police shall establish and fix the location of such traffic control devices as may be deemed necessary to guide and warn traffic under the provisions of this chapter, other traffic ordinances and the state laws. The Chief of Police shall have placed and maintain such traffic control signs, signals and devices when and as may be required to make effective the provisions of the Sedgwick City Code and other ordinances for the regulation of traffic. Any official traffic control device placed pursuant to this section shall be marked and labeled on a map of the City of Sedgwick for the purpose of displaying all such traffic control devices and shall be filed with the City Clerk to be open to inspection and available to the public at all reasonable hours of business. The Manual on Uniform Traffic Control Devices, Millennium Edition, published by the U. S. Department of Transportation, Federal Highway Administration, is adopted and incorporated by reference in its entirety and shall be as much a part of this article as if set out in full herein. The filed copies of the manual shall be marked or stamped "Official Copy as Incorporated by Ordinance No. _____." All sections or portions of the filed copies shall be clearly marked to show deletions or amendments from the standard manual.

SECTION TWO: SIGN LOCATIONS.

When the following traffic control signs are erected and maintained giving notice thereof,

drivers of vehicles shall obey the instructions or prohibitions provided thereon.

SECTION TWO: REPEAL OF CONFLICTING ORDINANCES.

All ordinances or parts of other ordinances in conflict herewith are hereby repealed. However, any section of an existing ordinance not in conflict herewith is not repealed and remains in full force and effect.

SECTION THREE: EFFECTIVE DATE.

This ordinance shall be in full force and effect from and after its once publication in the Harvey County Independent, the official city newspaper.

PASSED AND ADOPTED BY THE GOVERNING BODY OF THE CITY OF SEDGWICK, KANSAS, ON THE ____ DAY OF NOVEMBER, 2021.

Re: 30-Day Engineering Models Notification

Dear Mayor Chapman:

This letter is to notify you of the engineering data models that the Department of Homeland Security's Federal Emergency Management Agency (FEMA) is using in the ongoing flood hazard mapping project for Harvey County, Kansas. As discussed during the Harvey County Floodplain Mapping Data Development Kickoff meeting, which was held virtually on July 1, 2021, FEMA's goal is to provide useful, credible data, as well as a fair process to help you make informed decisions to build a safer and stronger community.

These engineering data models will form the basis for the proposed Special Flood Hazard Areas (SFHAs) that will be shown on the Flood Insurance Rate Map (FIRM) for your community. An SFHA is an area that is subject to inundation by the 1-percent-annual-chance flood (also called the base flood). Over time, water flow and drainage patterns in your area may have changed due to surface erosion, land use, and natural forces. Given these factors, the likelihood of flooding in certain areas may have increased or decreased, changing the SFHA designations.

Draft flood hazard information for Harvey County, Kansas was developed by FEMA's mapping partner, the Kansas Department of Agriculture (KDA) and KDA's contractor, Wood Environment & Infrastructure Solutions, Inc. (Wood). KDA will use the engineering models shown on the attached Engineering Models Summary Map, which lists the flooding sources to be studied, along with details regarding the selected models and the rationale for their use. The engineering models were selected based on a variety of factors including, but not limited to, the type of study performed, the size of the drainage area affecting the flooding source, and the type of terrain present (e.g., flat, hilly, etc.). KDA will compute the peak discharges using excess rainfall-on-grid methodology. KDA will use one- or two-dimensional HEC-RAS hydraulics to develop the 1-percent-annual-chance and 0.2-percent-annual-chance flood elevations and floodway. Finally, KDA will use the best available Light Detection and Ranging (LiDAR) topographic data, acquired from Kansas Data Access and Support Center (DASC), to delineate the flood hazard boundaries.

The Honorable Bryan Chapman, Mayor

November 9, 2021

Page 2

This project also includes production of flood risk products, which can help inform your community's flood risk planning and advance its work to reduce flood risk. KDA will schedule a Flood Risk Review meeting for communities in Harvey County, Kansas to review and discuss the proposed SFHAs, engineering analyses results and draft flood risk data tools, and to share strategies to reduce flood risk.

Upon receipt of this notification, your community will have 30 days to consult with Tara Lanzrath, KDA's Floodplain Mapping Coordinator, or Andy Megrail of my staff, regarding the appropriateness of the models and methods selected for the project. Alternatively, you can place a comment on the project web map at <https://gis2.kda.ks.gov/gis/harvey/>. During the 30-day period, please provide us with any data that you have that may be relevant to the project. We would also appreciate it if you would provide us with contact information, including email addresses, for any community officials, staff members or stakeholders who you believe would benefit from receiving updates and information about this project. Please note that your community will have several more opportunities to comment on and provide feedback about the models, the resulting SFHA delineations, and the draft flood hazard information, including an appeal period, before the flood hazard information is officially effective.

FEMA's goal is to ensure that the most up-to-date and accurate technical data are used to develop flood risk products. We rely on your feedback, partnership and knowledge during this important project to determine the extent of flood risk in your community, and in support of your efforts to reduce those risks. We look forward to working with community officials and other stakeholders in Harvey County, Kansas to raise flood risk awareness and reduce the risk to life and property from flooding. Your initial feedback will not affect your community's ability to provide feedback later, or to formally appeal the flood hazard information during a future appeal period.

To provide comments or to ask questions about this project, please contact KDA's Floodplain Mapping Coordinator, Tara Lanzrath at (785) 296-2513 or tara.lanzrath@ks.gov, or FEMA's project officer, Andy Megrail of my staff, at (816) 283-7982 or andy.megrail@fema.dhs.gov.

Sincerely,

Teri A. Mayer, Chief
Risk Analysis Branch
